

AP 3508 - Emergency Medical Plan

Any one of us may find ourselves as the first person on the scene of an injury or sudden illness or witness of a criminal act that could result in injury.

Medical Emergencies:

1. The department-of **Risk Management** has responsibility for maintaining an emergency procedure document prescribing protocols for responding to emergency situations which includes those of a medical nature.
2. The emergency procedures document will be provided and reviewed at new employee orientation and made available electronically. Emergency procedures documents are posted conspicuously throughout college facilities.
3. Emergency phone number labels will be provided to all employees. For those locations where an emergency procedure document is not applicable, emergency phone number labels will suffice.¹
